

available styles
SOLARO AIRE

Solaro Aire™ Attic Fans can be installed on any style of roof.
High Profile, Low Profile, Remote Solar Panel and Gable fan style options available to give you the best fit for your roof.

Solaro Aire™ High Profile

Ideal for applications where additional clearance (2") is needed between the bottom of the fan and the roof. Perfect for snowy areas or "S" tile roofs where less clearance could cause airflow problems.

Solaro Aire™ Low Profile

Provides the same performance as high profile bases when additional clearance is not needed. Tucks in closer to the roof to be less conspicuous and more resistant to high winds.

Solaro Aire™ Remote

Allows the solar panel location to be independent from the fan's so each can be placed in the ideal part of the roof. Can also be used with larger solar panels for improved performance or to offset poor light environments.

Solaro Aire™ Gable

Can be mounted inside the attic over an existing gable vent or roof penetration to supercharge the vents already there. Remains hidden and out of the weather, safe for the remote mounted solar panel. No large holes to cut in your roof.

Solaro Aire™ Tilt

27 watt or 37 watt solar panel, perfect for any installation that requires directing the panel towards the sun for better performance. 360° rotation and 35° tilt make it perfect for less than ideal fan locations.

Optional Accessories:

Solaro Aire™ Thermostat

Factory installed built-in thermostat allows the fan to operate only when the temperature is above 85°F.

Solaro Aire™ AC Connection Kit

Plug-in transformer and toggle switch kit offers opportunity to operate your solar fan during evening hours on AC power.

The Benefits of the
SolaroAire™

Solar Powered Horse Trailer Fan

All of the Solaro Aire™ fans qualify for a 30% Federal Tax Credit on materials and installation through the American Recovery and Reinvestment Act of 2009.

The Solaro Aire™ Limited Lifetime Warranty is the strongest in the industry.

The Solaro Aire™ doesn't cost one penny to operate! It's completely powered by the sun!

Built to be dependable. Weather resistant powder coated finish on all exposed fan parts provide a handsome and durable finish.

Can tolerate harsh weather conditions during that long drive down the highway.

It's not just different, it's better by design.

The world's most advanced, fully integrated, high efficiency Solar Powered Ventilation System

When you use The Solaro Aire™ Ventilation System the results are a cooler and drier space, prolonged roof life and an overall more comfortable living environment inside your trailer.

Solaro Aire™

Solar Powered Delivery Truck Ventilation

www.solaroenergy.com

how does it
WORK?

Solaro Energy wants to present to you our newest ventilation system for multiple types of truck trailers. This advanced system, extracts the air like no other fan, creating a more efficient air flow. This is a 25-watt unit fan that moves up to 900cfm.

This product has constant air flow throughout your trailer also known as air exchange or active air. Our fan is completely powered by the sun. By pulling outside air source in through existing windows and vents.

Wouldn't it be nice to be able to go on long trips from state to state while keeping your inventory at a comfortable and safe temperature? All of this is done through solar energy, so even when the vehicle is parked and the engine is off, the Solaro Aire Truck Trailer Ventilation System is on! This ventilation fan removes heat, odor, and provides continual air flow. Keeping your valuable inventory cool at all times!

Technology

features & benefits
SOLAR O DAY

SOLAR PANEL

- Unique proprietary design
- Low Iron-High transmission tempered glass
- Completely stand alone, no wiring required (Embedded models)

FAN HOUSING

- Seamless construction (no potential leaks)
 - Aircraft grade Spun Aluminium
- Powder-coated finish for durability & curb appeal
 - Resistant to rust and corrosion

FAN BLADE

- 12" aluminium fan - 5 blades (fire resistant)
- Blade shaped for more efficient air flow
 - Will not bend or create vibrations
- Computer balanced fan blades for dramatically longer motor life

**Solaro
Max Air Motor™**
Maximum Efficiency Yield Technology

Brushless Electronic Motor with Maximum Yield Technology. This new motor technology was developed by Solaro Energy - Our engineers leveraged lessons learned from our original brushless electronic motor that we used for over 12 years. This new motor technology offers about 30% better efficiency and air moving performance, with an amazing 100,000 hours average motor run time! That's about 25 years of system operation time!

You won't need to worry about rust or corrosion issues in diverse weather, a special Corrosion Resistant Aluminum Alloy is used for all structural components within the Solaro Aire™. The fan housing is fireproof with **NO plastic parts**, unlike the competition, which can deteriorate quickly in heat.
